I discovered this great 8-bit retro Android game a few years ago. After a few days I got to the end and wondered if I missed anything along the way. But after an extensive internet search I found only the two pages at GameFAQs that even discussed the game. So I wrote my own guide. I finished it over a year ago but wanted to post it to the archive for others to enjoy.

Well, here it finally is. Leave a review on this page if you like it. Also check back from time-to-time for new postings of other project I have in the works!

This page contains the following files:

1. Saga RPG I_ First Blade_1.1.19_APKPure.apk - the final version of the game downloaded from APKPure.com, because Gaagle does-not-Play-well-with-others Store no longer supports it.
2. GameFAQs-review.pdf - the only review of the game I've ever seen.
3. Lanzz-walkthrough.pdf - an OK walkthrough also from GameFAQs, converted from HTML to PDF by me.
4. RandyMan-walkthrough.pdf - my own walkthrough/stategy guide, every bit as good as any BradyGames guidebook, even if it doesn't have a fancy front cover.
5. Saga Poster-41x41.bmp - a fold-out poster map of the entire game @ 96dpi it will print 41" by 41", but @ 192dpi it is under 22" square.
6. SAGA-1-RandyMan-complete.zip - the complete work files DOCX and BMP tilesets used to create my guide, so others may try their hand at making guides for other android games.
